Quality Policy

Our quality ambition is to be a professional supplier of IT solutions to companies.

This means that:

- We will offer our customers documented competence and a high level of service
- We will create a clear added value for our customers
- We will deliver IT solutions that increase the competitiveness of our customers by certified consultants and market-leading manufacturers.
- We constantly review our working methods to improve ourselves and the business
- We meet our own, customers' and other binding requirements that affect our business

This policy is re-evaluated every year after the customer survey and compilation of data has been done.

Jesper Mathiasson, CEO
